

BALL/PIN DOB/DOP GAGES

Veit Tool's Dimension Over Ball/Pin (DOB/DOP) gages are designed for precise measurement of gear and spline pitch diameters, among other applications. Engineered for accuracy, durability, and ease of use, these gages continuously evolve with technological advancements. Their versatility allows for highly accurate measurement of various part features

Our units have been utilized in the manufacturing industry for over 30 years. From our simple economical 2-anvil single tool unit with indicator, to our "Dual" 3-station turret head design unit with optional part elevator platen, or custom design unit to fit your specific application.

Capabilities:

- Accuracy and repeatability to 2 micron
- Flexible capacity to handle a variety of part types and sizes on our "Standard" units

Key Features:

- Shop floor durability
- Capable of both internal and external applications
- Adjustable mesh engagement pressure
- Choice of mechanical or electronic indicator, digital probe or glass scale
- MarCom wireless data transfer software/with Mahr Type 1086RI electronic indicator
- Solartron IS5500 digital probe readout/ with digital probe
- Marposs Nemo Unit with probe

Or use data collection device of your choice
